

Levels of Impact When Weedcrafting

From Nicole Telkes of the Wildflower School of Botanical Medicine

1 Plant material that needs to be rescued from destruction or has been blown off by a storm or some other unseen force

2 Weedy Invasive Non-natives

3 Weedy Natives and Non-Weedy Non-natives

4 Non-Weedy Natives

5 Native, Less Common, at risk, ones to learn to propagate (from over harvesting or habitat destruction)

6 NO PICKS Endemic plants, plants that can't be propagated, Federally Endangered and Rare, Sensitive Native Plants
